Hongkong, July 31st, 1897.

THE transit pass system appears to work with remarkable success in the province of Yunnan, From the report of Mr. W. F. SPINNEY, the Commissioner of Customs at Mengtzu, we learn that of the total imports at that place 91 per cent. are sent inland

under transit pass. On referring to the Mail Contracts with the P. & O. and the Orient returns we find that while in 1890, the first complete year after the opening of the station, the total trade amounted to Tls. 1,104,007, last year it amounted to Tls. 2,476,675, showing an increase of 125 per cent, in seven years. This increase has gone on steadily from year to year, except that the figures for 1896 are smaller than those for 1895, but that is accounted for by the fact that owing to the weather and its effect upon the navigation of the Red River goods that ordinarily would not have arrived until the early part of 1896 arrived at the end of 1895 and went to swell the total of that year's trade. The remarkable and gratifying growth of trade at Mengtzu must be ascribed in a great measure, no doubt, to the smooth working of the transit sustained. The youngsters scored a complete pass regulations in the province. If there very serious nature, for no great complaint was londly applauded throughout the piece, been open. NOYES MOREHOUSE, the Acting Commissioner of Customs at Pakhoi, in his report for last year predicted that when the West River was opened a portion of the trade now passing Pakhoi would be diverted to Wuchow. There can be little doubt that the prediction will be fulfilled. The French, however, intend to compete for the traffic, and with that object are extending the Langson railway to Lungchow, in Kwangsi, near the head of the navigable portion of the West River. Hitherto foreign goods have filtered upstream and crossed the border into Tonkin, but now. it is designed by the construction of a railway to reverse the traffic, the intention being that goods shall be imported by sen to Haiphong, be transhipped there. to the railway, and so conveyed Lungchow, whence they are to be distributed throughout South China by the West River, its tributaries, and the various land routes.
